ABOUT ME

I am a backend developer with extensive experience working with PHP, specializing in web services and API integrations. I love a challenge and I enjoy testing new technologies.

SKILLS

PHP, Git, Docker, Node.js, HTML5, CSS3, JavaScript

EDUCATION

Bachelor's Degree in Computer Engineering
University of Alicante SPAIN, 2006 - 2003

EXPERIENCE

SENIOR BACKEND DEVELOPER EVENTBRITE

Remotely for Madrid, Spain
2020 - Present

I joined the Supercreators Team to provide modern self-service ticketing tools and migrate a legacy service handling over the 40% of the current income in fees.

SENIOR BACKEND DEVELOPER SPOTAHOME

Remotely for Madrid, Spain
2019 - 2020

As part of the Integrations Team, I was responsible to build custom integrations with third-party platforms as well as developing the public API so property management platforms can use it to publish and manage their properties.

Our project helped to improve the acquisition and reduce rejection rates due to outdated occupancies. We also reduced manual work from agents and customer support.

SENIOR PHP DEVELOPER PINGVALUE

Remotely for Genk, Belgium
2016 - 2019

We migrated the legacy API to RESTful and build a new infrastructure in Kubernetes, allowing us to have proper environments for development, acceptance, and production.

As a startup, we built a strong and collaborative team of over 20 developers using Agile methodologies supporting frequent releases on web, iOS, and Android.

SENIOR WEB DEVELOPER EMBARCADERO

Remotely for San Francisco, United States
2013-2016

My main goal was the development of the new features and services for the company and end-users.

We integrated all the different services on the Community social network, migrating all the data from legacy databases using custom scripts and building REST APIs to allow integration with core Embarcadero products as Rad Studio.

WEB DEVELOPER PROYECTO8

Alicante offices, Spain
2008-2013

I was responsible for a 24x7 SMS platform. Our main product was an SMS Chat and other related services for local television broadcasters such as surveys, quizzes, news alerts, ringtones, images, etc.

We also developed marketing tools based on SMS, email, and smartphones.

WEB DEVELOPER ADORAMEDIA

Alicante offices, Spain
2007-2008

My main tasks were web consulting, basic web management, direct contact with customers, and training new employees in the company methodologies.

WEB DEVELOPER NITSNETS

Alicante offices, Spain
2006-2007

In the last year of University, I started 2 months of internship and after that I joined the company.

In this time, I worked in web consulting, some internal projects, and mentoring other students during their internship.
