ABOUT ME

I am a backend developer with extensive experience working with Go, Ruby, and PHP, specializing in web services and API integrations. I love a challenge and I enjoy testing new technologies.

SKILLS

Go, Git, Docker, Kubernetes, PHP, Ruby, Node.js, HTML5, CSS3, JavaScript

EDUCATION

Bachelor's Degree in Computer Engineering
University of Alicante SPAIN, 2007 - 2003

EXPERIENCE

SOFTWARE ENGINEER

CABIFY

Remotely for Madrid, Spain
2020 - Present

In the Governance team, I improved security for drivers and riders while maintaining service quality. I led social authentication in the Rider team, integrating social media login to enhance security and reduce SMS costs. I supported the PSD2 migration in the Payments team and improved fraud detection and payment workflows.

SENIOR BACKEND DEVELOPER

EVENTBRITE

Remotely for Madrid, Spain
2020 - 2020

Worked with the Supercreators team to modernize B2B self-service ticketing tools, significantly enhancing user experience and business functionality. Led the migration of a critical legacy service that accounted for over 40% of the company's fee income, ensuring minimal disruption during the transition.

SENIOR BACKEND DEVELOPER

SPOTAHOME

Remotely for Madrid, Spain
2019 - 2020

Developed custom integrations with third-party platforms as part of the Integrations Team. Optimized the property management system, reducing outdated occupancies and enhancing acquisition, resulting in higher conversion rates and reduced manual workload for local teams. Led public API development, enabling seamless property management across partner platforms.

SENIOR PHP DEVELOPER

PINGVALUE

Remotely for Genk, Belgium
2016 - 2019

Contributed to defining technical workflows and building APIs following RESTful architecture, using TDD and CI. Led the migration of legacy APIs by eliminating Google App Engine dependencies and deploying Kubernetes infrastructure, enhancing scalability and environment management. Played a key role in a startup environment, collaborating with a team of 20+ developers to deliver frequent releases for web, iOS, and Android platforms.

SENIOR WEB DEVELOPER

EMBARCADERO

Remotely for San Francisco, United States
2013-2016

Developed new features for Embarcadero Developer Network, improving the overall experience for developers using core Embarcadero products such as RAD Studio. Led the integration of services within the Community, a social network for developers, by migrating legacy databases and building robust REST APIs.

WEB DEVELOPER

PROYECTO8

Alicante offices, Spain
2008-2013

Managed a 24/7 SMS platform with multiple providers, delivering scalable and cost-effective marketing solutions. Developed SMS services like live chats, quizzes, and real-time alerts for TV networks, boosting viewer engagement. Created multi-channel marketing tools utilizing SMS, email, and mobile apps for comprehensive and targeted communication strategies.

WEB DEVELOPER

ADORAMEDIA

Alicante offices, Spain
2007-2008

Offered web consulting and support for small to medium-sized businesses, enhancing their online presence. Contributed to the execution of web projects, improving clients' digital communication strategies. Trained new team members on company methodologies, ensuring effective onboarding and adherence to best practices.

WEB DEVELOPER

NITSNETS

Alicante offices, Spain
2006-2007

Assisted in developing company-specific solutions during my final year of university. Gained experience in web consulting and internal projects. Mentored peers during their internships, offering guidance and support.
